Cool. How did you do it? If you don't want the whole world to know you can PM it to me. It looks like it hurt a bit though (looking at health).

its not that hard to do, it just takes alot of time. i will give u 2 hints, you can only get up GDIs side and you need both sides vehicles.

lol, I know how do do it. I used to get on top of the Refinery in online games for fun.

Of course, nobody was playing for points, we were trying to get up there.

So it is more of a true exploit then. I guess it won't work on sniper servers, since vehicles are not allowed.

That is the only thing I can't figure. I used the NOD base and started at the Hand, so you could go out the second floor.

If you truly did do this, which i doubt, tell us all step by step, how you got up there, me and my bro are gonna try it now, and if we don't get it I doubt theres a way.

You could test the hight of the blockers with an orca to find a low enough spot.

srry i have been in NY on vacation for a while and now i am at my grandma's house on her crappy dial-up. Ok here is what i did

- 1) killed the refinery on GDIs side so that the harvy wouldnt mess it up
- 2) bought vehicles on Nod and drove them to the GDI base
- 3)switched teams
- 4)put the vehicles in a line
- 5)switched back so i couldbuy a specific vehicle
- 6) got on top of the vehicles and walked to a place i knew i could get up
- 7) walked up the low spot and up to the volcano
- 8)slipped off
- 9)walked the vehicles again and then i got up to the volcano

There the secret is out if you can find the right place to do it.

See, you're just shooting yourself in the foot, because in your pictures, the GDI refinery is very much operative.

And, there's a zero NOD score...
