the APC's in renegade have a small graphics problem, usually the tops of them are completely white, its not a big problem, but the thing is i used to have windows 98 on my computer and this didnt happen, now that i have win2000 it does, oh yeah and there are some problems with the water in the second level of single player mode, its just kinda messed up lookin.

my comps stats are Dell Dimension XPS T600r, P3 600mhz, 128mb SDRAM, 16mb ATI rage 128 pro, Windows 2000 (fully updated) directX 9.0

my guess is that i need a new driver for my video card, problem is my video card doesnt seem to be too popular, anyone know some good sites?

ummm... you should be able to easily download a new driver from ati.com.

If that doesnt work, try:

<http://www.rage3d.com/board/forumdisplay.php?s=507fe9b2633da4ddd31410099c100b13&forumid=1>

Register a nick there and ask the question.
