I am not sure but for some reason you can only look up certain people. At least that is how it is for me.

Ok first start renegade. Then log in to WOL.

Once on the game list move the mouse all the way to the left. A menu will appear. Click rankings, then click individual rankings.

Enter the name of the person you want stats for in the upper right box.

Find the persons name in the new list given to you and clikc their name.

You should get a ton of stats such as kills, shots fired, Deaths, etc.
