well, I bought me a 5.1 surround system. it works fine, but there is something strange if I play renegade. when I select Surround in renegade, then it doesn't work . then I hear just 4 speakers. so renegade doesn't support 5.1 surround sound?

ohh, yeah... I found a way to get it to work.  
when I play renegade, my "windows" music settings changes to 4 speakers.  
you have to change it to 5.1 while playing renegade.
