I have a Radion 9800 and my comp was randomly restarting when I was playing this game. Does renegade not support this vidio card and there for will only work for a small amount of time before crashing?

help me please

No, the video card should work fine. There could be a chance it is overheating. If you keep having issues, you might want to go swap it for a new one.

The video card will work fine. It'll be most likely that your motherboard can't handle the card well.
