Ok. When i play renegade sometimes out of nowhere my fps goes from around 110 down to 5 or less and stays their until i restart ren or leave the game. i was just wondering if anyone knows how to fix this or if its just a bad bug. oh and my vid card is radeon 9700 pro 128mb.

p.s. if anyone knows a good pop up stopper thatd help cause they keep minimizing my renegade as well..

That's an interesting problem, and one i've not really heard of in Renegade. You might try getting the latest drivers from ATI.
