Thanks to everyone who helped me with my questions.

I have finally finished my beta flechette chem sprayer weapon.

This skin makes the flechette gun and chem sprayer blue.

It also makes the flechette guns flechettes blue, It make the chem spray blue, it makes the tiberium scorch marks and flechette holes blue, it makes the explosions when these weapons hit something blue.

This will NOT affect your flamethrower as I have not modified the emaster file

PLEASE tell me if there is anything wrong with my skin. I need to know so I can make a final version

You can get it here

<http://www.7of12.co.uk/stalgren/blue%20flechchem%20weapon.zip>

p.s. Sorry for lack of screenshots. It would take a lot to show the explosions, skins, bullets holes etc.

I was also caught up in the moment and forgot

EDIT: Added blue tiberium poisoning effect

EDIT: Fixed small flechette bug
