Is this yor map titanx17? I remember one that looks very similar to it called Silent Dawn but I don't remember you making one called High noon? Seems a little different from each other but mostly the same, just wondering if it is your map and not a ripoff by someone?

Yeah it was in the renbattle map pack which has no readme in. <http://www.renbattle.com> they have custom maps on their server all day but the server lags quite a bit if you live anywhere but the country the server is in. It's a good map though, it was fun playing it and the base defences make it harder but a mammy rush worked and we got the Nod base down.

Lol that server is lame. I said "fuk" and got banned from the server. They can advertise xxx on the server but you get banned from saying a simple word like that. It was good but why they ban me for saying something like that. It looked like it was the BR system which did it as it was autoresponse.

Br.net has FUK programed in it to kick....The servers run because of the xxx site....he has people that have said I'd like to help the server out with a donation or what not so if they are 21 they can donate to what keeps the server up....Bans for swearing are not permanant...I'd just leave a msg in the bans section saying you were frustrated and was unaware of the rules...and would like to have my ban reviewed...I know you from here and your a good guy,They'd usually check logs to see if you tried to go around the filter or have been a problem in the pass,If not your ban will be lifted.

I let BR kick people for cussing,I watch for people screwing around and Hampering their team and acting like N00bs...i must say theres alot of well mannered people there nowadays,And I'd like to see you in-game again soon.

Just post a lil msg in the ban section and we will take care of it.

Yeah I'm definatly banned. I understand that the server is supported by an xxx site and it's a great server. One of it's kind in GSA, But I can't understand why they banned me. Not even one single warning.

- Gonna play some Planetside instead

This happened to me as well, simply page the host, asking for an Unban. (it worked for me, maybe i was just lucky that the Host was actually there though)
