http://www.renhelp.co.uk/Tutorials/FAQ has a transparant gif logo at the top of the page that I found somewhere on the web.

swhats the size has to do with it?

what im tryign to say is with any background color(except white0 it shows like a few white dots around the edges abd stuff

You mean like this? It would need a little touch-up if you use it on a lighter background.

There are a few black pixels around the edges that wouldnt look very good on a white background.

some painting programs have a color select selection tool, drag it all over the logo then invert selection then find crop and crop it. then all you have it the logo, your crop might work the other way so you might have to keep the logo selected and crop
