I'm running XP Pro , I can run Zone Alarm the free version but when I try the trial for Zone Alarm Pro 4, it will freeze after running for a few minutes and if I try to access the internet I can't unless I close zone alarm. Any one else have this prob?

dont have zap but with all zonealarm versions there's this stupid true vector bug (really pisses me off)
for more information just search "True Vector Engine" on google
