For a long time i've had this problem with hosting.... When my game server starts everything is working fine... but when the game ends and it begins to start up a new game my computer starts lagging or starts freezing up and then i get disconnected from renegade... so i have to restart my whole computer... any tips how to fix this

I know EXACTLY what the problem is. Change your NIC card to a different brand, this hosting problem happens with some NIC cards.

Yes, I have had that problem on my older PC, and someone on n00bstories has the same problem and this worked for them. Just try a different NIC card they are like \$5-\$15 it never hurts to have a few extras
