Is there any way to tell when the images were uploaded to someone else's gallery?

Probably because you're trying to upload the 1.5 mb .tga files that Renegade saves screenshots
as. :rolleyes: Get Irfanview and convert whatever screenshot you're trying to upload to .jpg, then it
will work.

Um, actually I don't log that. I just log the last hit on the file. If it were really vital I could probably
grep my access logs and figure it out.
