From: VF I22 | Posted: 6/13/2003 5:50:01 PM | Message Detail
falling to your death really sucks.

From: Epic | Posted: 6/13/2003 6:48:31 PM | Message Detail
they sure as hell do. it's inconvenient as hell to ejectulate all over the windshield.

From: pi314159 | Posted: 6/13/2003 7:33:53 PM | Message Detail
I believe the word is 'ejection'. And no, they shouldn't have one.

From: MetalUmbreon | Posted: 6/13/2003 7:50:05 PM | Message Detail
yeah they could...but to make it even they should have a parachute that is real weak *30 HP i guess* and someone can shoot it down to kill you...

From: molson19 | Posted: 6/13/2003 7:50:14 PM | Message Detail
yeah, because what if the ejection seat went off early and you prematurely ejected..... that would be bad.....

From: tenchi dark | Posted: 6/13/2003 8:25:17 PM | Message Detail
Uhh, I think would one of those would 'distract' the pilot enough to crash the craft. GDI and Nod would really need to redesign the craft j/k

Dam this thread/topic will be modded.... oh well, still funny as hell though

From: Kefka the Crazy | Posted: 6/20/2003 10:39:36 AM | Message Detail

If they were to make an ejection seat for aircraft, what would happen if you fly a plane with a female character?

From: kirbypower gabe | Posted: 6/21/2003 8:12:06 AM | Message Detail
The buttons would get sticky without one...

Alls you need to do is install a little splash shield....you know the ones like they have on Salad bars at restuarants, then you wouldnt get the problem with sticky buttons.
