I guess you never played Red Alert. Artillery doesn't fire directly ahead of itself, that isn't its purpose.

I don't see anyone else complaining about the way Artillery functions. No artillery unit in real life fires directly ahead of itself, it always fires from a distance and saturates an area with shells.

Hmm someone else making fun of something just because he's not good at it. It's called LEARNING. You learn to adapt to the arc the shell makes when you fire. It's a great distance weapon, however, JUST LIKE RED ALERT it has no close range fireing abilities, and needs support.

Go play Red Alert. You'll see the same thing can happen there. Besides, why are you attacking the enemy base without tech support?

That will be soon.....

I'm guessing around the time the new game from EALA is announced.

ROFL ACK, still bad mouthing Reborn, even after what Dante posted this weekend.... Now that's irony.

bigejoe14Why is Reborn the only Ren mod here with a leaked beta?

The real question is why is it the only one worth leaking?

No offense to other mod makers, I'm just saying that Reborn and Ren Alert are the only mods with a lot of publicity...

The Matrix Mod I made got leaked, though. Of course, I'm not going to be able to finish it, so I'm glad what was done did get out there after all

No...

Because, like it or not, Reborn has the same engine, the same physics... mostly..

It's built upon Renegade, not devoloped anew.

I think Reborn and Ren Alert both look pretty cool. I have no idea which one will be better since I only played that one very early beta of Ren Alert and nothing of Reborn. Honestly I don't see the purpose of insulting either of them. It's not like you purchased it and are unhappy with your product. These people are supplying it for free and it is 100% optional whether or not you want to download it, if you don't like it there's no reason to run around saying it's a load of crap or whatever. No one is really in any place to complain (unless its constructive criticism or suggestions of course).
