coppied form mod forum because some of you don't go there... (makes a change from all the cheating threads too)

http://www.n00bstories.com/image.fetch.php?id=1188088877 <-- spawn tubes

http://www.n00bstories.com/image.fetch.php?id=1329104020 <-- working target range

http://www.n00bstories.com/image.fetch.php?id=1000134823 <-- arena view from spectators area

http://www.n00bstories.com/image.fetch.php?id=1068212744 <-- water feature & host box

http://www.n00bstories.com/image.fetch.php?id=1315778717 <-- power up pedistals, advert banners, and those 20 extra characters as used in Temple_DM.

The duelling system (no host)

http://www.n00bstories.com/image.fetch.php?id=1189858089 <-- Timed C4 placed in the center of the arena, upon detanation.... you duel

The duelling system (with host)

http://www.n00bstories.com/image.fetch.php?id=1248907832 <-- Remote C4 is thrown from the host's box to the center of the arena, which, when detonated starts the duel (speeding up the duelling system)

Obvious rules:-

1. Only the specified number of people in the arena at any one time.

2. DON'T use the purchase terminals during the duel.

3. End of the day the Host decides.

Suggestions for Host:-

1. Only talks in CAPS so everyone knows who the guy in charge is.

2. Vary the matches 1v1, 2v2, GDI Vs Nod, Snipers only (you get the idea).

3. Renegade auto complete could help you with the above (announcing matches)

4. Always be Nod, so you can spot any SBH trickery.

Suggestions for Combatant:-

1. Don't be a dick

bigejoe14Someone run a server so we can play it.

Enter a game called 'roleplay' or 'roleplay & duelling' and tell them about it they are the type of
people this map was made for, I'm sure they'll atleast consider it

I did post back asking if it was a renegade related site (a requirement of getting in) I couldn't find anything at the time that suggested it was so it was nerfed, sorry

The gaming realm's banner wasn't the best quality hence it's absence. (i have to think of my final product too)

Well, it's related to the Ren. Community since Nitrous-Oxides = owner of PrimeServers...But I guess that I've never seen the reply...

I already tried...

This was the result:
Quote:WinZip
Cannot open file: it does not appear to be a valid archive.

If you downloaded this file, try downloading the file again.
|OK| |Help|

And my connection is not an issue because I am running on 1Mbps broadband.
Downloading the 8mb file took me about 8 seconds.

Try to DL latest Winzip Version...maybe that solves the problem.

Duh... I'm using 8.1 SR1.

Could you please try zipping the file and upload it again? Check if the byte size is different from local copy.

Really, the file is corrupted. I tried it with Iceows and Explorer it was unable to open it.
I am not going to install 100 .Zip programs just to open one file.

The downloaded file is only 8114 KB while it should be 8392KB.
