Hey guys hows it goin,
ok, I don't have any servers on my Advance Listings, this happened after i installed Reborn"the mod", and i uninstalled reborn, any suggestions how to fix this sh1t,

thank you

all repects

You shouldn't have installed it, but go to your data folder, and delete the thing Called cameras, it's a configeration file.

That's all you have to do to get it to work again.

There an uninstall file in C:\Westwood\Renegade\, its called "unist000.exe" or something similar like that. (for the mod)

Just to clear that up if you don't know the extension of a configeration file it's .ini

So just move out cameras.ini to play normal games and move it back in to play reborn games .

If you had the earlier beta you would have seen the message that tells you about this.

Subject: ok, thanx guys,

half3lif3i read the first post, it worked, thanx guys for respondin to my problem, owe yall one.

all respects

See that's all he had to do to get it to work again, just cut the cameras configeration file out he didn't have to un install it.
