Everytime I try to install RA2 on my windows XP (brand newgame/computer) it wont do it. I meet all sys.requirements and whatnot, it opens up, then goes black sscreen, minimizes to the desktop, but supposedly is still running, if I click it again the same process happens. It did it with Renegade but I reinstalled it and itw orked, this one I cant even install! Help!

Try going to the game.exe file properties and run compability for win98 or something. Quite a few games don't work with xp.
