Only thing i don't like about the n00bstories radio is the bitrate it's streaming in. On 56k it takes 10 seconds to buffer 5 or so seconds, then you have the 10 second pause again, whilst it's buffering the next part.

Any chance you could lower the bitrate? I realise this will lower the quality a little, but i'd like to

listen occasionally.

Dudes lower the quality of the radio im 56k and i have to wait 2 minuets for the next 5 seconds of radio. 56k needs to be included more when u make big dicissions. dont u think?
