Does anyone know where I can get a Nod and a GDI heli pad, or something similar?

I had released the Helicopter Pads with aggregates last year as a joint venture between myself and Westwood Studios. They were available for download from Renegade Realm, but that's long since been dead.

I don't know where you can find them now. I may upload them somewhere, but considering almost no one does anything with the structures in Renegade to begin with, I don't see a point in wasting my bandwidth on it.

My plan was to use them as a drop location for hummvies/buggies.
