I was playing the other day and come across more than enough cheaters , i contacted one asking where to get the cheats etc etc, well i fianlly learned that ****removed**** has FinalRenegade a cheat that needs to be quickly wiped out, i dont know if anyone wants to contact the owners to remove that cheat or what.

Im just saying this for the meantime to reduce the cheaters.

Thanks

The Flubber

Many sites have it, you can't stop them. We don't even need to stop them, cause in a few weeks all there lame ass mods will be useless.

I know it's taken (alot) longer than we all thought it would. Sadly these sort of delays happen when you have multiple people with busy schedules working on one project, coupled with the fact that

everyones work relies on the other person having done theirs. It's coming.
