I copied the N and the D, and then tried to make an O because I want to writer NOD in the lettering on the Renegade logo banner thing. The N and the D came out good but not the O

Like this?

sirphoenixx.topcities.com/logo_nod.gif

(P.S, it wouldn't take any more than a minute or two to do this in MS Paint, all you have to do is cut out the N and D to make the N and D in Nod, than copy/paste the D, cut it in half, copy/paste this half D, mirror, and put it together with the other half D, and you got NOD.)

How ere you making the Fon, with what program, If you send it to me I would try and finish it. . .
All I need is an N, O, D, and a G, D, I those are the only letters I need for what I am doing . . .

sirphoenixx.topcities.com/logo_gdi.gif

I'm going to create the entire alphabet using my photoshop...

(In .gif's not font files since 99.9% of the time you'd use them in logos and images, only an idiot

would use them as the font on the actual website (instead of arial or helvetica for example))

You could try using the Regatta Condensed font. It's the only one that creates characters that at least look similar to ones used in the Renegade logo.

Damn site is down...

I'll e-mail the thing later today.

        USE PHOTOSHOP.

anything else would be a waste of your time, trust me. It's a powerful proggy, and you can do wonders with it.

Photoshop 7 is good for anything simple like this http://yano7.com/Logo/main.jpg or complex. I want to try the new one but there is no trial yet and I don't have $800.

PS 7 is 1337

My sig is proof...

CS is so sick. The previews are so wicked. I want to get the whole suite.

InDesign
Photoshop
Illustrator
