Hey,

I know they're broken. We upgraded PHP (among other things) to the latest version and forgot to compile in the add-on required for the images to be generated. This also affects the image uploader on n00bstories.com. Blazer is recompiling PHP right now so they should be working soon.

Errr.

Why doesn't he just use a Renegade one. 1 is enough.

The ladder is still currently on the fritz. Don't know when it will possibly be fixed.
