You people seem to forget that this is a FREE project made by peope using THEIR own time, and in a way THEIR own money. They dont have to offer any source, any updates, any nothing. Dont talk all your blabber and criticizim to a bunch of people that are working out of their own time to make something that YOU will use and will ENJOY for FREE.

Had they not mentioned they were making anything you wouldnt be harrassing them anyway and when it was done you would have been gratefull about it.

Now go get laid, breath some fresh air and stfu.

And to those that will post *technicalities*, get a life. The point is, you wont pay for this so dont DEMAND unless u are willing to DONATE to them.

well thats a lot off my back, not including the hair. I bid you GOOD DAY!

ps. Thx for the effort RENGUARD team.

retard

Probably a 14 year old kid that doesn't know anything about computers. His only hope is to place his faith in someone that appears to know something.

There have been PLENTY of threads about this subject and there's no point in starting your own. And because of this I will not even try to defend myself.

yet you see the title, read it, open it, and reply to it. I dont need to know about computers to know that no matter wtf you say IT IS STILL SOMETHING THEY ARE DOING WITHOUT CHARGING YOU.

now until you come up with something of your own you can stfu. seriously tired of you attaking them when YOU aint doing shit to help.

even if they dont come through, who gives a f. It was THEIR own motives that started it, and just

as well they can end it without anyone claiming anything. Now get out your dam hole get some light and get off this COMPUTER COMMUTIY ETTIQUETTE bs u are on. REnguard team doesn become our property just because they announce something.

There have been PLENTY of threads about this subject and there's no point in starting your own. And because of this I will not even try to defend myself.

Why did you post this?

What was the point? What do you hope to gain from it?

on any other forum on the internet he would have been banned 100 times over.
i dont understand why Crimson puts up with his idiocy day in and day out.

bring out the ban stick Crimson and whack him hard.

once hes banned he'll sure go whine somewhere about how he was banned for xpression his opions or w/e but who cares, if he was xpressing opinions with intent to help it would be great. But hes just out to get attention with his whining posts.

You sure seem to want to get your hand on the source code, i wonder why...add to that the rumors that you have created some cheats yourself but w/e. Ban him and then he can cry about his ban somewhere else.

ps im xpecting a smart ass replay from you, so dont bother. I've dealt with bigger idiots then you at my job. Again, go outside, get some sunshine.

There have been PLENTY of threads about this subject and there's no point in starting your own. And because of this I will not even try to defend myself.

He who throws insults without using proper grammar is a bigger retard then he who posts "thank you".

That wasn't meant as an insult to you, just fl00d3d. You took the time to post a thank you, be it in this thread or another and that is decent.

dommafia started this thead to start trouble. There have been at least 10 different threads of this same subject that have been argued for months. There was no point to start another one like this.

OMG, I just caught that you think I wrote the cheats? lol Where the hell did you hear that joke? Need I remind you I initiated the Tsunami Alliance which was founded to unite all anticheat efforts? That's what started my arguments with the RenGuard team (because they didnt want to work with us).

I don't even use freakin skins, let alone mods or cheats. Use your superman skins, color C4 skins, bigheads, and damage hacks ... and I'll still find a way to kill your n00b ass. How? Because I play the game the way it was intended to be played ... I practice hard ... and I know how to defend myself from cheaters. Don't even think about calling me a cheater. I'm probably the LEAST likely canidate in the community. Wow, I can't believe someone actually wrote that. My clan (which was founded on a code of ethics) will love that one.

(sidenote: vegetta, what makes you think I ever lost any argument here? It's all a matter of opinion really).

Oh, and in case you haven't heard I'm producing my own anticheat right now (which for the record WORKS on linux FDS and is being beta tested on Windows FDS). It took me about 20 minutes to think of how to program it, and about a week of actual testing. And when I'm done, I WILL be releasing sourcecode unlike RenGuard. The n00bs who created the cheats aren't smart enough to find a counter to my program ... so I'm not afriad to release it.

What started this argument was they won't release their source code to you.
Go ahead and release your code. That is your choice because it is your property, RenGuard is not.

You demanding the source code to renguard is like me demanding that you hand over your car's engine to me.
