Don't they sound better!?

Also, if anyone could tell me the name of the chaingun .wav file. That'd be helpful for version 2.0. You will also get credit for it!

Thanks your name will be in the acknowledgements.

I know, there seems to be like no reload sounds. If someone finds a place with some, tell me and you'll be in the credits, too!

May I suggest simply looking in the presets using LE? They have all the names of the sounds in there

or u can take the existing renegade sounds and throw them into a sound editing program and redo them your self. thats what i did with my rifle_fire.wav. i found a wav file called alt rocket fire. and chopped off all but the front and now my rifle sounds really beefy.

j4S[p]Don't they sound better!?

Indeed, to me the pistol sounds like it's a gunshot from a movie.

Very well done.

p.s. I haven't smoked crack for months

A few of the sounds had problems. The pistol fire didn't sound the way it was supposed to and when you fire about 20 rifle bullets the sound disappears.

drkhazeWhen you fire about 20 rifle bullets the sound disappears.

Renegade has trouble doing sounds, or it just might be your soundcard.
