Due to some AOL kiddie with enough knowledge to know he gets a new IP everytime he redials, Any IP starting with 172 will be kicked, this affects AOL users. The guy kept laying beacons and my mods kept banning him, but it's not fair that they should spend all game banning this guy, if anyone on AOL can manage to get his screen name I'll be happy to report him. These logs have his WOL names:
[04:08] [@JTeKGuard]: @iamquest: !ban danny beacon
[04:09] [@JTeKGuard]: Player dannyj7 left the game
[04:04] [@JTeKGuard]: @K3Bot: !ban havok9845 no beacons kthx
[04:05] [@JTeKGuard]: Abop2: fuck you
[04:05] [@JTeKGuard]: Player havok9845 left the game
[04:05] [@JTeKGuard]: Host: (JTeKGuard): Banned :: havok9845:: by K3Bot :: for no beacons kthx
[04:01] [@JTeKGuard]: Results found: lowcloud9:172.199.127.129
[04:01] [@JTeKGuard]: Results found: snipeboy1:172.198.57.177

EDIT: I'm scripting a way for AOL users that I can trust to join, if you want to join post your WOL name below

One of the games I have been playing in my absence, Starsiege, has a similar type of script, which bans all AOL users...unless the user has a key script, which allows them entry. The key script is specific to that person, so they are not interchangeable. I suggest you get in touch with the owner of this page:

http://www.rockshq.com

he is the creator of that script...he may or may not be able to help you with this. That's sort of a stab in the dark, since Renegade is probably coded differently, but it's worth a shot.

I said SHOULDN'T be on a 56k. I didn't say you havn't or I will hunt you down if you have.
It even says on sys requirements on the box to use DSL/Cable.

And I didn't even have to say:
ApocXS
well fuck you.. that is all...

HomeyWhy ban all aol when maybe if you ban just that specific range you ban maybe a

AOL routing isnt set to area, its just sign on and.. "hey have this address"

That's why nobody has sympathy for AOL users, cos the vast majority of them cause too much
trouble.

If I had to guess I'd say my thread has been hijacked, it's not really a matter of 'you have 56k and I
hate you!@!!111111omg!1111' it's more of you and your ISP is nothing but trouble for my server.

Hey, 56k is fine as long as you can take a bit more lag and don't play on >20 player servers. I
played on 56k until about 2 months ago.
