Yeah americans play on the US Server.

But there are not only Americans on the world and for example Germans try the European Server first.

That means the mod is not popular here

all 3 servers are run off of one computer in california. It doesn't matter which one you use, but there is always going to be more people in the US server.

And if I may ask a slightly irrelevant question... what program is used to find the servers? WWO? ASE? Gamespy?

They are talking about WOL/WWO. But it will run on Gamespy and ASE also. ASE is just a server browser for Gamespy.
