I am going insane here.. I am on mission three, I just destroyed the power plant, and destroyed the hand of nod... now where do I go??? I have been all over the map back and forth from the beginning to the hand of nod building for 4 hours now! I read a walkthrough that says get on the roof of the hand of nod building... Well there is a door in this building that doesnt open, all the others doors in the hand of nod building I have opened and none got me to the roof..

Anyone here able to hint me in the right direction so I can get to this airplane and the scientists? Thanks in advance.

One of the objectives was to take out the Obelisk after you took out the Power Plant. I would suggest you do that if you haven't. Either that or you have passed up a key card.

You should be able to get onto the roof somewhere...I think you need to go to the main entrance of the HoN, then take the elevator that goes up.

You have done something wrong...

Are there any objective left on the radar other then rescue mobius? When i first played it i forgot to check one of the houses in the first few milies into the map, which sucked, also if the door doesnt open it probably never will. I've have this glitch before were the dorrs just dont open. Try pressing E a few time or your action key. Also what elivator are you talking about? the one in the hand or obilisk?

I've completed single player, and they're right, you do have to take the elevator up to the higher level. There you get the keycard to go to the lower level. If the elevator for whatever reason doesn't come, try using 'E' or whatever your use button is. It shouldn't be needed, but it's worth a try. And make sure you stand close to it so that it will come to your level.

Do you have to go into tunnels at ob/pp side?  
Or go to hon?  
I already destroyed ob/pp/hon but can't get anywhere.  
Or maybe I forgot a keycard after destroying pp.

I'm surprised no-ones mentioned this, but to get an elevator to your level you simply stand beside the doors and do nothing, don't press anything.

---

Bustin, did you say it wouldn't work until you got the internet patch? That seems strange.

And the door being a different texture makes me think you had an erroneous install of either the game or, more likely, a rare level/script bug that could be fixed by replaying the mission from the start.

Kriegerv you go to the main entrance of the Hand of Nod (where the big door is that needs a green keycard to unlock, and the 2 elevators and the passageway between them) then from facing the elevators and the passageway, take the elevator to the left of the passageway. That leads you to the top of the building. A cutscene comes and there's a green keycard you can use to exit the Hon from the front side, or simply go down the side of the building (commando style ) and get to the back of the Cargo Plane without having to fight Mendoza. Be careful though because there's a rocket soldier on the side balcony on the Hon that could even kill you with 1 shot so take him out before you go down the side of the building.
