Ok, I am going to set up a small dedicated server because I have nothing better to do. How long should it be before I receive the dedicated server serial number? How do I use Blaze Regulator . . . do I have to start up the server then run Blaze Regulator? Where it says host name under advanced game listings, how do I make the name have capitals in it because they never show up as capitals if I type them. . . Last thing I hope how do I do maps to the map rotation because when I click the add thing when I am in Blaze Regulator I am given no options of which maps to put in. This may all sound stupid but I don't really know what I am doing and could use some help.

EDIT: Found where to get dedicated server serial number . . . Found the FDS . . . other questions still need answered please.

Open FDS before BR. To set-up BR see my topic here:

Thanks . . . I just need a dedicated server serial number now, how long should it take to receive one, I did the thing to get one about an hour ago or a little more and I haven't gotten an E-Mail yet . . .

OT: Does anyone know what font is used on the Renegade logo, or a font that looks like it or is similar to it?

The font must be hand made if you wish to use it elsewhere, and the FDS service is currently AWOL. No one is getting serials.
