<http://www.brenbot.com>.

To see brenbot in action join [#n00bstories_rensvr1](irc://irc.n00bstories.com)

Note that BRenBot is remote administration/enhancement software for Renegade SERVERS only.
If you do not run a Linux or Windows dedicated server this will be of no interest to you.

Allo, I don't know if anyone would want to but I host a small renegade server that I don't know much about. WOL is down right now but later when it's up I was wondering if anyone could help me set up Brenbot for my server... I really don't know anything about the FDS except how to get it

up and hosting. It's a Win32 just so ya know.
