A few older threads...

I've been looking for the original threads where i posted the status/release of the few programs i've made for the renegade community.

RenAutoComplete
RenBuddyList
RenSkirmish

I've done a search here, but they may have been back on the old forums...

We have them...we were planning on importing them but never got around to it...the mod forum and tactics forums were imported. I will see about importing all the old general forum posts. If there is a specific one you are looking for I can try to dig it up.

I have your renbuddylist ap, but I beleive I have the beta version as I was one of the testers. Don't know if that'll help or you need the specific post and not the program...

Thanks Blazer, that'd be helpful if you could dig up those threads.

snipesimoHow ironic, I was just gonna contact you and ask you to fix your RBL app What needs fixing?
