First of all , the map itself (C&C Airbase v1.0) is finished, but there is a major bug that causes it to crash upon loading

I'm pretty sure that the presets are completely screwed up, and as a last resort, I'm going to try and recreate all the temporary presets I added. If it works, I'll be able to release the map within a few days, if it doesn't, I'm just going to trash it and release the old beta.

EDIT: ARGGHH why do all the problems end up being the last ones on my list of problems, I'm now almost positive that it is in fact a corrupted texture that is causing the map to crash, the good news is that the map is saved , but I'm going to have to test all the textures and find the corrupted one. If everything goes right though, I'll be able to release it tommorow.

It looks now like I'm going to have to get someone to fix these textures for me, I have no editor that can work with .dds files.

If anyone would do this PM me.

Get Adobe Photoshop <http://www.adobe.com> . . . get the trial > fix the textures > upload map
somewhere > make topic releasing map > ppl are happy

<http://www.adobe.com/products/tryadobe/main.jsp#product=39>
