After my update yesterday I got br to work/startup on suse9.0 from the os I used before suse8.2 but the problem still exist that the bot dont know that players joins the server.

<http://www.renegadeforums.com/viewtopic.php?t=8527>

Exampel if I join my own server the bot prints out "Tomten joined" in mirc but when I do !players or any other player commands or even try to !kick tomten byebye the bot tells me "no such player online".

And yes I start the wrapper first and then brenbot and yes I can telnet in to my server.

I have no ide where the problem is and if this cant get solved I cant have my server up anymore for public use
