I never had to deal with this before but could someone help me find a skeleton named S\_A\_Human ?

If you know where it is, full filename, or can just send it to me, reach me on msn (deafwasp@yahoo.com) aim (deafwasp) or e-mail (deafwasp@yahoo.com)

Thank you.

I believe that is located in the "characters" folder of any modfolder you create in Level Edit.
