I notice that when I went through the server listing for exemple: Black-cell 32players showed only 5 players but when I press the join button it shows like 27 players in there right now.

Pages outside of any server dont work, only pages that works is inside a server that you paging a player in the game.

Server Owners will not be able to recive pages to there FDS.

EA Tech's Sucks..... :rolleyes:

When I leave a game I have to disconnect and then reconnect to WOL before I recieve the game listings again. 'Tis a right pain in the arse.

I can't connect. It worked last night. All I can say is this is what happens when EA gets rid of WW, no support, and crappy C&C Generals. **** EA.
