The model looks good...but...is there any way to make the camera farther away. It looks like it would be hard to tell if infantry are coming from the sides or the back.

great job you guys, keep em comin. looks great.

To NodBugger*

changing the profile to a different vehicle would help, i usually change it to Nod Apache if its a large vehicle, its the only way i know. btw u do that in level edit. just goto the vehicles settings tab, and under the Profile text box u can type in the profile of a vehicle in renegade, and the camara will be set to that vehicles camara. i dont really remember completely, i havnt played around with the ren tools for a while. Im not really good at explaining things, but i hope that helped.

but its upto ack if he wants the camara a bit farther away or not.
