ATI recently released the Catalyst 4.1 drivers, and finally the flickering mesh problem in Renegade seems to be gone. Hooray ATI! If you have a Radeon card and have that flickering problem, I suggest you get the new drivers:  
<http://mirror.ati.com/support/driver.html>

good and bad  
now i have to update all 11 dirvers for my AIW

Display driver  
capture drive  
control pannle  
MMC  
DAC  
DVD  
Remote wonder  
Easy look  
FM tunner  
TV tunner  
overclocker

ppl have reported a Frame rate hit of 10% not cool  
ill stick to my flickering

9700 Pro

No loss of Frame rate and no more texture problem.

Then again I have a system that can utilise the card fully so that may be why.

tnt comp is good enough. I can assure you lol. Maybe he is just going crazy with all his  
drivers...lol.

Gotta love the All In Wonders...

My 9800pro ownz. I hear the new drivers suck. I'm sticking with my current driver version, in  
Reneagde I experiance no problems.
