Nashtlthanks for pointing that out jack ass

Lol... Now you're a n00b. Here's some advice, don't start flaming others (for no reason) when you're looking for help, it really doesn't make them want to jump up and help you.

Oh...

You have to download and install Gmax first. Renx is a gamepack (think plugin) for Gmax, it must have Gmax installed to work.

Go to the Discreet Gmax site (<http://www.discreet.com/products/gmax/>) and click on the blue "Download Now" link on the left, scroll down to where it says:"gmax 1.2 Installer [19MB] " and download it from one of the links under it. Install it, than register it (doesn't cost anything btw), than install the renx game pack (follow the instructions)
