A long time ago some Renegade beta test files were posted here. It mostly contained WAVs.

If anybody has the disc, could it be possible to post up some files which may have not included in the zip file?

As I recall the original zip was 60 mb, but the copy I have is only 29 mb.

I have the 29MB one too. As ACK confirmed a while back, the original one was bigger. I'm not sure where the 29MB one came from.

There isn't anything that's really useful in it. A few purchase icons that you won't get to work, and that's about it.

Some random sounds, but they're not very good.

I think some people would just like to take a look at the old files though . . .

Isn't that the same thing as in current Renegade?  
The old sniper rifle had square scope screen.

The old Sniper Rifle is this:

(Founded at CNCDEN)

And Silenced Pistol:

(Founded at CNCDEN too)

<http://www.cannis.net/commando/images/renegade/>

Renegade images, from the present and the past. Note that some images are messed up, but I'm trying to fix it.

When I get those images sorted I'll put up a page for them.
