http://www.klan-host.com

We used servermatrix for 1 month (3 weeks really) and had terrible problems with latency and disconnects from WOL.. I gave them a chance to figure out what it was and fix it, but they couldn't do it unless I sat there 24/7 and collected tracerts from 3 other locations TO the server every time it disconnected from WOL.. so I just said "bye"

We've only had 1 night where there were problems with our current provider, and it was their upstream providers routing.

so does BC.

i'd say servermatrix is one of the best cheap providers out there, they do have somewhat slow support but its worth it for the price.

Can't say 100% as of yet mainly because i haven't put the order through yet, but on Monday/Tuesday it should all be going through.
