Ok, I downloaded this program to get away from never finding a serial for Renegade Dedicated Server Patch.

Now I have no idea how to work this thing out. I've tried my best to set it up, but I know I've made some mistakes along the way. And on top of that, mIRC is a program that I haven't used before. I kne I should have listened to my buddy when he said to get into it.

In addition to all of that. I'm not even sure this brenbot is even compatable with WindowsXP, or if I got the Right version of it.

However, I need this thing working bigtime, so I ask if anyone is willing to help me out.

Now there's a nice little program I have that will give a user the abilities to control my computer through a window on their computer.
I was hoping someone here, who knows how to get brenbot to work to please help me out.
I'll be willing to give you "limited" access to my computer in the comfort of your home.

Please MSN me, if you want to tournaquet@hotmail.com

Could you be somewhat more specific?

add me to your msn : zunnie@quicknet.nl (Edit: Ive added you now, nvm) ill help you setup BRenBot and an IRC Channel + i dont need access to your pc

Sorry i could not help you dude you really need a FDS Serial before you can even install the Renegade FDS ((((((((((Is anyone here smart enough to create a keygen for this ?

i don't think you're able to make a keygen for FDS serials, because they have to be registered in the EA database I think, so if you generated them you'd be stealing other people's!!
