I have been waiting for this game for a loong time and finally I got to play the demo!

<http://www.unrealtournament.com/ut2004/downloads.php>

UT2004 Demo.

209MB Get it at all costs!

I played it today and i had so much fun doing it.

The Onslaught game mode is very fun. Involves flying vehicles, land vehicles, turrets and base repairing. Its so much fun, and I only played against the smart ass computer!

I don't want to draw you away from Renegade, but If you don't play this game you'll never know what you are missing out on!

XMP > UT2004

Graphically, gameplay-wise, whatever. I was disappointed in UT2004, but I guess the demo's still sorta cool.

No way. Ut2004 rules. The demo is so good.

Onslaught is great fun!

Although I am doubtful about the cost for the full version....6 CDs....

[View Forum Message](#) <> [Reply to Message](#)

Well seeing as it is the demo/beta, it surpassed my expectations. It was more fun to play than I thought it would be, and it isn't all blood and gore.

I am doubtful that it is 6CDs. Where did you hear that?

gamespy.

It'll come in 6 CDs....or 2 DVDs for the special edition.

I think.

[View Forum Message](#) <> [Reply to Message](#)

XMP was a free multiplayer addon for unreal 2: awakening.
Ive played 2 games of 2004 and the bastard think crashes my pc,... ghey

Unreal 2 eXpanded MultiPlayer

It's a free download if you already have Unreal 2. Fantastic game, graphics are unbelievable.

This demo rules! I'm definently buying the full version. I like killing soilders with that one buggy with the two retractable blades on it's side.

I personally like shooting down other jets (forget the name) with my own jet. "TOP GUN!" I also like the Scorpion. A cool thing is that if you drive past a lightpole or wall with the blades out, they will snap off.

PointlessAmblerA cool thing is that if you drive past a lightpole or wall with the blades out, they will snap off.

OMG LOL I was wondering what happened to my blades, now I know that they will snap off LOL. I like this game, well the demo of it anyways I like Onslaught the best out of all of the game types.

I like shooting down aircraft in the node turrets. It just feels... rewarding. One thing that I didn't like was how both teams have the same vehicles and weapons. That kind of sucks.

Look at this:

Voice-over IP support - command and coordinate. Give orders, rally your troops or talk smack with the enemy.

Voice recognition - give orders to bots; no more typing when you should be fighting!

Completely redesigned menus, including a new server browser with right-click menus and many brand-new configurable features.

Improved AI: vehicle control, advanced dodging and wall-dodging, improved aim, better team coordination.

Deeper single player mode with comprehensive team management options, challenge matches, multiple endings and more.

Integrated map vote and match set-up for Internet play.

UnrealTV - a proxy broadcast system allowing a huge number of spectators to watch a match live over the Internet.

Pixomatic software renderer allowing incredible performance with no 3D card required. Play UT2004 on your laptop!

A re-designed HUD, improved weapon effects (bullet decals, incredible explosions), improved first person weapon rendering and innumerable improvements for mod authors, new announcer voices, rendering optimizations...the list goes on!

These are the features I took from official site. It brings everything we always wanted for Renegade. I'm downloading it now!
