Hey guys, I'm having some problems with renstat, it's uploading some weird tables to my site. I'm using it for the Zero X server. Have a looky here: <http://ladder.cnc-era.com/>

I know there have been a few thousand ppl playing on the server so somethings not working right...

I know this isnt the right forum to post it in but it seems to be closest.

Thanks,
Toasty

Have you downloaded all the RenStat updates so it works with GameSpy players?

yea, you mean the latest version at beaconped right? I downloaded it again just to make sure now i'm getting weird stuff <http://www.cnc-era.com/stats.htm>

It worked about 3 months ago, but I can't figure out what happened since then.
