Hey all, I am pretty well versed in most parts of modding Renegade and I'd really like to know what you guys want to see in the form of tutorials. I have been meaning to try and make one for a while now and now that I have time, I have no topic.   Anyhow, reply here with some idears and I'll see what I can do.

Haha, nobody wanted to use the last tutorial I wrote. Anways, if Blazer and Crimson can get back the posts from the OG Mod forum, it pretty much covers every question ever asked about modifying the game.

You could make a load of gmax tutorials... oh wait, I'm making a load of them...
Ok, I dunno what you should write. I guess everything has been covered/will imminently be covered.

You could make a tutorial on how to make buildings that unfold
I have posted another message for more info

DoitleOk, sounds good, but modeling what? Buildings? Vehicles?

You could do a few:

Building

Vechile

Terain

Bodys *

The bodys one is one I wan't you could explain how to mirror a body and make both sides exactly the same and the you can still vary them later if you like....

I forgot what that was called is it instacne or domething...

If you were to make a tutorial where would you put it I would say everybody should put there tuorials at:

http://www.nodnl.net

I've made a tank tutorial.
http://www.cncpo.net/tanktutorial

Hit "Read" under the tutorial.

sorry, I'm afraid cncpo.net gave me a nifty offer to house the whole series. I know matrix has a copy too, but they're not getting the rest of them.
Sorry.

^^ I agree with the vehicle doesn't have to be a vehicle...but..

If you have hte world box on the elevator to squish people, how are you going to enter the elevator from the side?

well, if you want it in RenHelp Renegade Modding Help file, post it here
http://modx.renevo.com/forumdisplay.php?s=&forumid=10
and it will be in the next available build.

thanks guys, and keep up the good work.
