yo... i have some serious mayor error here...
i'm making an object (whatever it is) and i save it as a gmax file. Good, no problems here... but each time i want to load my previous saved gmax file, i get this error:

i am unable to load my stuff, can anyone help me?

Check http://www.renegadeforums.com/viewtopic.php?t=7126 thread or download it from http://www.renhelp.co.uk downloads section. It was a MS patch that screwed up gmax files, you can save but not load. Normally the patch fixes it.

ok nvm, thanks anyway ^_^

i found a site (more of a forum) with both win2k and winxp patches for all langugaes, they are from MS site itself so why dont you put them on renhelp?
