For some reason when I play as GDI, it appears my character (GDI\_Minigunner\_0) is controlled by AI. Is there any way to turn it off?

It's weird, that happened to me like a year ago when I was playing with the CTF scripts, it prevented me from releasing my really crappy map. Except it happened on the Nod side. I think it has something to do with the presets, change those at all for the spawner/soldier? Anyway, I don't know how to fix it, but it happened to me.

you should check to see what preset you are trying to spawn for the minigunner, then go to that preset and take a look at it and make sure the only scripts on it are -  
M00\_GrantPowerp\_Created POW\_Pistol\_Player  
M00\_GrantPowerp\_Created CnC\_POW\_MineTimed\_Player\_01  
i think if u put any ai type script on it it will make ur person not function properly like u were saying.  
if you know you didnt edit any of the settings then just make sure you are spawning this preset -  
CnC\_GDI\_MiniGunner\_0  
(unless you already are then go check it)

hope that helps

No no no, its because Default Hibernation is not enabled.

Your wandering around like an AI bot, because you are an ai bot!

Cpo64No no no, its because Defalt Hibernation is not enabled.

Your wandering around like an AI bot, because you are an ai bot!

That reminds me, back in the old multiplayer demo days, my sister left the game for two seconds, we were exploring the map, and both were standing in front of each other ( and we were in the same room ) and then, her character starts moving! It was even shooting at me!
