Someone is distributing a virus, marked RenGuard.rar. It seems a simplistic enough "Delete everything" script that any virus scanner should laugh at, but I'm letting you know just in case.

Thanks to Speedy of RenStation for letting me know about this.

There are no leaked versions of RenGuard. Nobody outside of the team has even seen a screenshot of the code.

Yeah you'd figure a professional web site designer would know how to spell.

think it the other way... do the designers of renguard have to be bothered of a few bad spellings?
they have allready designed the Anti-Cheat program
so i would give them an applause for it Klap Klap Klap
