Predator is one of my favorite movies. I liked most of the Aliens ones too, but Predator has much more rewatchability...and Arnolds one-liners are much more amusing than Sigourney Weavers boney ass.

Secretly, for a long time predators and aliens have been having gang fights on earth, and now there is another big battle happening with scientists discover it. Therefore, there are a lot of special effects, monsters, and guns.

The End, I think.

I'm really looking forward to this film. I've always been an Aliens fan, although I was shit scared of it when I was young. The fact that something growing inside you is going to burst out some day scares you. Imagine dying like that?

I wonder if they'll be any Predator Aliens in this like the game.

The Thing is better in terms of horror value. One of the scariest movies ever made.

For being created in 1982, its special effects beat the hell out of a lot of the computer generated stuff today.

Plot Summary for  
Thing, The (1982)

Page 11 of 33

An American scientific expedition to the frozen wastes of the Antarctic is interrupted by a group of seemingly mad Norwegians pursuing and shooting a dog. The helicopter pursuing the dog crashes leaving no explanation for the chase. During the night, the dog mutates and attacks other dogs in the cage and members of the team that investigate. The team soon realises that an alien life-form with the ability to take over other bodies is on the loose and they don't know who may already have been taken over.

Some of the effects were gut wrenching.

"I know I'm human. And if you were all these things, then you'd just attack me right now, so some of you are still human. This thing doesn't want to show itself, it wants to hide inside an imitation. It'll fight if it has to, but it's vulnerable out in the open. If it takes us over, then it has no more enemies, nobody left to kill it. And then it's won."  
(MacReady)

AVP movie comming out? That is good, I am looking forward to seeing how peace of sh!t will it be. Most movies created from games, or games created from movies suck. Star Wars is one of few exceptions

Calm down. I said Most, not all. I said that because most mew movies are not very good and there is a chance that AVP will not be a good movie. I know that Alien and Predator was movie long before the game, and it was one of few exceptions of good games made from good movies I don't smoke. One more thing: written offence is pointless.
