Ok this is a new map made by my friend called tmpsych0.

It is called DGC snowland.

It is an infantry only map, i want everyone to have it because it is such a good map. It has good background music but it stops after a while:(

I dont know how to add it so you can download it though

Click here to view my website.www.freewebs.com/renextras

It has maps, mods, skins and more

But it is not finished yet. it has a lot of skins on it though!

Reply with info on how to add the map to here so you can download it!
