RenEvo?

You mean REOL?

This is the dumbest post I have EVER read.

1. RenEvo isn't a program.
  2. If you extract something to a directory, nothing will happen. Duh. You have to start the program or whatever it is. Simply extracting it won't do shit.
  3. I highly doubt whatever you are using came without a readme.txt on how to use it.

well it was the RenEvo.pkg file and a readme that told me to put it into the data directory. I got the damn thing off moddb.

Aaaaaah... I think I know what that is...

Extract it where it says, run Renegade and host a 1 player LAN game. On the map selection screen just select the mod and play!

Oh, and isn't your avatar reserved for someone else?

Dante, since you are somewhat out of the Ren community, will you still be supporting REOL when WOL shuts down?
