At the bottom: http://xccu.sourceforge.net/ra_icons/

All you have to do is model the mammoth tank, but instead of the turret, model two cockpit like things, that cylinder, and the warning light thingie...

(That's the image I used to do my MAD tank...)

There is only one image of the MAD tank, and that is the icon. The MAD tank is the mammoth tank's chassis with a couple minor additions.

That's not what you said, and you were refering to Ack...

You'll see the MAD tank when it's texture is done. (Which would be soon...)

Will the MAD tank work the same as it did in the original RA?
